Summary

Frontend Engineer with 10+ years of software development experience, including 5+ years in web development using **Vue.js** and **React.js**, and 6 years in desktop application development using **Visual Basic** and **MS SQL Server**. Skilled in building responsive interfaces, integrating REST APIs, and creating reporting systems. Comfortable working across the full stack using **Express.js**, **SQL** databases, and legacy systems like VB.

Skills

Frontend: Vue.js, React.js, Nuxt.js, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind, REST API Integration

Backend: Express.js, Node.js, Firebase, PostgreSQL, MySQL, MS SQL Server

Tooling & Workflow: Git, Github, Gitlab, Bitbucket, NPM, PNPM, Yarn, Vite, Webpack, Postman, Jira, Figma

Soft Skills: Communication, Task Management, Team Collaboration, Problem Solving, Resilience

Professional Experience

Software Engineer (Oct 2025 - Present)

Mekari Qontak (Yogyakarta, Indonesia - Hybrid)

- Contributed to the end-to-end feature development, system maintenance, and bug resolution for the Qontak Omnichannel Dashboard.
- Serve in a weekly on-call rotation to provide rapid technical support, handle live confirmations, and deploy urgent hotfixes, ensuring high system availability.
- Coordinate bi-weekly production deployments as part of a scheduled PIC release rotation.
- Actively contributed to a major architectural migration from legacy Nuxt 2 to a modern Nuxt 4 ecosystem, driving a 40% improvement in the platform's Lighthouse performance score.
- Leverage AI-assisted development tools (Claude Code and GitHub Copilot) to accelerate feature delivery, optimize code quality, and maintain the Qontak Omnichannel Dashboard.

Frontend Developer (Dec 2024 - Jul 2025)

PT Kita Semua Satu (Sleman, D.I Yogyakarta)

- Maintained and enhanced 10+ dynamic components for tables and forms.
- Developed interfaces based on UI/UX team designs, resulting in a 15% improvement in user satisfaction.
- Collaborated with the backend team to optimize data structures and facilitate data integration, leading to a 20% reduction in data processing time.

Frontend Engineer (Oct 2022 - Nov 2024)

PT Privy Identitas Digital (Sleman, D.I Yogyakarta)

- Collaborated with the project team to develop applications for various companies, integrating Privy digital signatures for enterprise users.
- Partnered with the UI/UX team to design optimal applications based on user requirements.
- Teamed up with the backend team to integrate API data into the web application interface.

Frontend Developer (Nov 2019 - Oct 2022)

PT Sprint Asia Technology (Malang, East Java)

- Managed reconciliation and disbursement systems.
- Developed user interfaces according to PM designs.
- Collaborated with backend teams for API integration.
- Built a company profile website for Bayarind, a subsidiary.

Software Engineer (Oct 2013 - Nov 2019)

3PM Solution (Malang, East Java)

- Designing the interfaces for the app based on user requirements
- Writing code based on the design
- Testing the code logic and flow
- Deploy to user PCs
- Training the users on how to use the program
- Troubleshoot and Technical Support

Projects Highlight

- Qontak Omnichannel Dashboard (Tech: Nuxt.js, Vue.js, TypeScript):** Qontak Omnichannel is a unified inbox platform that consolidates WhatsApp, Instagram, Email, and Telegram into one workspace for customer service and sales teams. It solves fragmented communication by centralizing conversations, automating responses with AI chatbots, and enabling proactive outreach, helping businesses improve response times and boost engagement.
- AHM Loyalty Management System (Tech: Next.js, React.js):** a Next.js web application for AHM, managing loyalty programs with features for vouchers, points, promotions, and customer interest reporting, to boost engagement and sales for 1,600+ dealers.
- Trakindo (Tech: Nuxt.js, Vue.js):** Developed an internal Nuxt.js web app that digitized 100% of inter-branch documents, processing over 500 documents weekly, significantly reducing paper consumption and processing time by an estimated 75%. This app allows users to seamlessly upload, digitally sign, and download documents, improving efficiency and security.
- My Grocery (Tech: Next.js, PWA):** This web app lets you plan meals and generate grocery lists automatically based on your selected menus. Reduce grocery planning time by an estimated 80%. Available as a PWA, it offers convenient mobile access.
